

BinarySEC SaaS

Security with peace of mind

"91% of websites are vulnerable"
White Hat Security

"15% of the sites we host have been hacked"
A major web-hosting company

**"10 to 15 of our machines are hacked per day,
out of a total of 3,500 dedicated servers"**
Another major web-hosting company

Data theft, breaks in service, identity theft, frauds, the illicit use of your servers...
Cyber-attacks result in financial losses. They have legal consequences and a negative impact on brand image.

A managed security solution for the protection and acceleration of your web sites and applications

Protection against attacks

The SaaS solution allows all abnormal traffic on your site to be rejected. It protects you against data theft, breaks in service, identity theft and many types of cyber-attack.

Acceleration of 10 to 200%!

The SaaS solution reduces the time your pages take to load by using BinarySEC Web Caching.

Compatible with all web sites and servers

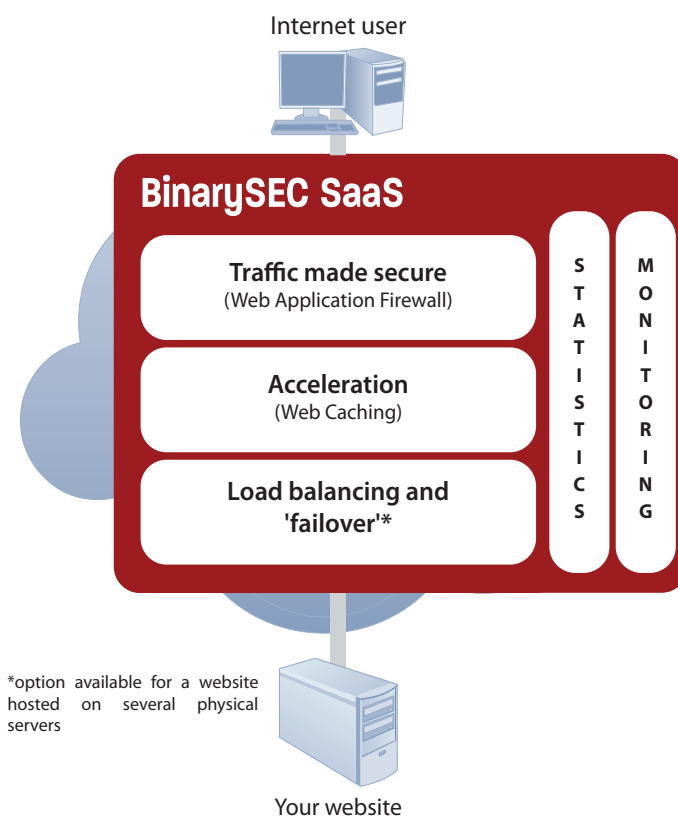

BinarySEC SaaS runs on a platform which is administered and supervised from our datacenters. It has no prerequisites.

Monthly subscription includes:

- **Setting up** your site on our platforms
- **Prior learning** of normal traffic
- Web traffic made **secure** (*HTTP and HTTPS*)
- **Acceleration** from 10% to over 200% !*
- **Daily supervision** of your site's traffic
- Access to our interface to monitor the traffic and statistics in **real time**
- **Monthly activity report** including detailed statistics
- **Email and text alert** if the site is unavailable
- **Telephone alert****
- *As an option : **load balancing and 'failover'** for a server farm*

* accelerated page loading using BinarySEC Web Caching technology

** our team will contact your nominated representative in the event of a major alert
